U-Fixx

"The More You Walk On It The Stronger The Bond"

UZIN U-Fixx is a double-sided adhesive tape for the installation of dimensionally stable textile and resilient floor coverings. U-Fixx dry adhesive technology does not require monitoring of flash times or trowel size selection associated with wet lay adhesives, eliminating costly potential for installation error.

A great tool for use on time-sensitive projects and in occupied areas.

KoolGlide "Pro-II"

3X Faster Cycle

The KoolGlide system is a new and completely unique method of making carpet seams. The KoolGlide tool is run **ON TOP OF THE CARPET**. The glue on the seam tape is heated from the bottom up, keeping the carpet cool and preventing distortion!

- reduces distortion
- eliminates smoke-odor
- fast and easy to use
- instant ready use
- no messy clean up
- bonds on demand
- reconstruct seams

KoolGlide technology uses a lightweight hand-held electronic tool that melts the adhesive using a pre-programmed heating cycle, controlled by a state-of-the-art microprocessor. KoolGlide creates a powerful bond that can be stopped and started anywhere along the seam, and can easily be removed later for easy repairs.

AquaBar Barrier Paper

Asphalt laminated duplex type kraft paper 3' x 167' (500 s/f approx)

AquaBar is an extremely effective moisture vapor retarder for use under hardwood flooring. AquaBar slows moisture migration and is a superior vapor retarder.

It is not a waterproof membrane.
