The KoolGlide system is a new and completely unique method of making carpet seams. The KoolGlide tool is run **ON TOP OF THE CARPET**. The glue on the seam tape is heated from the bottom up, keeping the carpet cool and preventing distortion!

- reduces distortion
- eliminates smoke-odor
- fast and easy to use
- instant ready use
- no messy clean up
- bonds on demand
- reconstruct seams

KoolGlide technology uses a lightweight hand-held electronic tool that melts the adhesive using a pre-programmed heating cycle, controlled by a state-of-the-art microprocessor. KoolGlide creates a powerful bond that can be stopped and started anywhere along the seam, and can easily be removed later for easy repairs.

**Seamer Down Pro**

Powerful vacuum pulls heat and moisture up and out of the carpet while it draws the adhesive up into the carpet backing. The results are a flat cool seam that can be stretched in minutes.

Powerful 2hp motor.

- Cooler heat shield
- Dual light indicators
- Large control knob
- 15’ heavy duty cord
- Extended tail groove

Evenly spreads heat over the entire iron base. High-quality thermostat reduces high/low temperature swings! Heat shield stays cooler to protect today’s softer, temperature sensitive carpets! Heat shield temperature has been “tuned” to perfectly re-activate TRAXX seam welding sticks.
